International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

Ocean Engineering

Preface. 1

Description of Some Numerical Tools for Solving Incompressible Turbulent and Free Surface Flows: O. Daubert, J. M. Hervouet and A. Jami 3

Numerical Modelling of Wave-induced Currents in a Breakwater Situation: D. Yoo . . 21

Numerical Modelling of Wave Propagation using Parabolic Approximation with a Boundary-fitted Co-ordinate System: T.-K. Tsay, B. A. Ebersole and P. L.-F. Liu . . 37

Wind Waves Evaluation in the Adriatic and Mediterranean Seas: L. Cavaleri, L. Bertotti and P. Lionello 57

Wave Plan Computation Method in Study of the Calvi Bay Erosion in Corsica, France: A. Lejeune, M. Lejeune and M. Sahloul 71

Hydrodynamic Analysis of the Surf Zone: A. S. Arcilla. 87

Study of the Behaviour of Oscillatory Waves in a Lagoon: M. M. Cecchi 103

Modelling Coastal/Shelf Systems with Emphasis on Long Term Trends: J. C. J. Nihoul, S. Djenidi and J. H. Hecq 113

A Three Dimensional Global Weather Prediction Model Using a Finite Element Scheme for Vertical Discretization: J. Steppeler 129

Numerical Modelling for Tide Flow and Pollutant Transport in Taipong Bay, China: Zhan Xiaoyong 145

Calculation of the Force Coefficients of a Tubular Jacket Structural Member with an Appurtenance by the Discrete Vortex Method: M. J. Downie, B. A. Murray and P. Bettess 153

Non-linear Stochastic Response of Marine Vehicles: C. Duthoit and J.-L. Armand . . 169

The Influence of the Form of the Log-conductivity Covariance on Non-Fickian Dispersion in Random Permeability Fields: P. Salandin and A. Rinaldo 185

Application of Soil–Structure Interaction to Off-shore Foundations with Specific Reference to Consolidation Analysis: R. W. Lewis and D. V. Tran 195

F.E. Solution of a Vertically Averaged Model for Regional Land Subsidence: L. Simoni and B. A. Schrefler 215

Issue No. 2

Composite Structures

Preface 231

Some Recent Developments in Numerical Modelling of Fracture Toughness in Brittle Matrix Composites: C. L. Hom, P. A. Mataga and R. M. McMeeking 233

Homogenization and Pre-integration Techniques for Multilayer Composite and Sandwich Finite Element Models: G. Laschet, J. P. Jeusette and P. Beckers 257

A Damage Prediction Method for Composite Structures: O. Allix, P. Ladeveze, D. Gilletta and R. Ohayon 271

Homogenization and Damage for Composite Structures: F. Devries, H. Dumontet, G. Duvaut and F. Lene 285

A Partially Bonded Beam Element Model for Superconducting Magnet Pancakes: R. E. Gori and B. A. Schrefler 299

Fatigue Life Estimation of Graphite/Epoxy Laminates Under Consideration of Delamination Growth: H. W. Bergmann and R. Prinz 323

Composite Plate Analysis Using a New Discrete Shear Triangular Finite Element: P. Lardeur and J. L. Batoz 343

On Refined Computational Models of Composite Laminates: J. N. Reddy 361

Buckling and Postbuckling Analyses of Laminated Anisotropic Structures: A. K. Noor and J. M. Peters 383

On the Analysis of the Buckling Behaviour of Laminated Composite Plates and Shells: B. Geier and K. Rohwer 403

Analysis of Viscoelastic Structural Elements in the Frequency Domain: W. P. De Wilde and A. H. Cardon 429

Optimum Design of Composite Structures: G. N. Vanderplaats and T. A. Weisshaar . 437

CONFERENCE DIARY 449

Issue No. 3

Iterative Methods

Preface 453

New Techniques for Fast Hybrid Solutions of Systems of Equations: J. Mandel and W. L. Miranker 455

A Unified Treatment of Superconvergent Recovered Gradient Functions for Piecewise Linear Finite Element Approximations: G. Goodsell and J. R. Whiteman 469

A Dual Adaptive Procedure for the Automatic Determination of Iteration Parameters for Chebyshev Acceleration: T.-Z. Mai and D. M. Young 483

Fully Vectorizable Block Preconditionings with Approximate Inverses for Non-symmetric Systems of Equations: J. C. Diaz and C. G. Macedo, Jr. 501

Experience wih the Conjugate Gradient Method for Stress Analysis on a Data Parallel Supercomputer: S. Lennart Johnsson and K. K. Mathur 523

The $D^{1/2}$-Norm of the SOR and Cyclic Chebyshev Semi-iterative (CCSI) Methods for a Class of Non-symmetric Matrices: D. J. Evans and C. Li 547

On an SSOR Matrix Relationship and its Consequences: S. Galanis, A. Hadjidimos and D. Noutsos 559

The Vectorization of ITPACK 2C: T. C. Oppe 571

An Introduction to the NSPCG Software Package: D. R. Kincaid, T. C. Oppe and W. D. Joubert 589

Algorithms for Construction of Preconditioners Based on Incomplete Block-factorizations of the Matrix: P. S. Vassilevski 609

A Mixed Finite Element Formulation for the Boundary Controllability of the Wave Equation: R. Glowinski, W. Kinton and M. F. Wheeler 623

On a Class of Preconditioned Iterative Methods on Parallel Computers: O. Axelsson, G. Carey and G. Lindskog 637

Multigrid Solution and Grid Redistribution for Convection–Diffusion: G. F. Carey and A. Pardhanani 655

Author Index 665
